

> Misys provides integrated, comprehensive solutions that deliver significant results to financial services organisations. In capital markets and investment management, we offer the most comprehensive cross-asset, front-to-back coverage available in the market, with more than 20 years of expertise in complex derivatives including exchange-traded, over-the-counter (OTC) and structured products. We provide award-winning solutions for creating and pricing new structured products that improve transparency and reduce risk.

Misys Summit FT

Summit FT is our flagship solution for global investment banks offering a broad cross-asset coverage – OTC derivatives, fixed income, foreign exchange, equity and structured products – enabling our customers to manage the complexity of today's financial markets. We enable an organisation to grow through innovation, improved management of liquidity and reduced costs from operational risk control, streamlined processes and

improved straight-through processing (STP).

Misys Sophis RISQUE

RISQUE is a cross-asset trading and risk management solution used by more than one-third of the world's top 25 banks. It offers extensive instrument coverage combined with integrated market, counterparty, operational risk and STP within a single platform. The solution includes model and instrument customisation for limitless innovation.

Misys Sophis VALUE

VALUE offers cross-asset portfolio and risk management, which covers the whole STP process: investment management, risk management, middle/back office and accounting. It combines sell-side level financial and technological capabilities with the user-friendliness, connectivity and ease of implementation required by the buy side. More than 80 institutions worldwide have adopted VALUE, from start-up hedge funds to global asset management companies.
